THE VERSATILE EUROBOX
WILL ADAPT TO YOUR BUSINESS

The Eurobox is the new flagship of the Paragan Company, uniquely offering benefits like extremely high payload, enormous transport capacity, low floor height and all this requiring only a Class B driver's license. The versatile Eurobox offers many additional options that enable the vehicle to adapt to the specific needs of your business. The Eurobox is ideal for both domestic and international transport and can be fitted with a sleeping cabin.

EUROBOX SAVES YOU TIME AND MONEY.

ULTRA-LIGHT, ULTRA-STRONG

WE'VE DECREASED THE WEIGHT AND INCREASED THE STRENGTH

Compared to standard vans, the Eurobox is made of special ultra-light and highly resistant material that significantly reduces the weight of the vehicle and thus increases the payload.

The ecological construction material is highly resistant to chemicals, abrasion and scratching, is not prone to corrosion or rot, and thus guarantees a long service life. Vehicles fitted with the Eurobox are in the lightest commercial vehicle category up to 3.5 t.

The XL model can haul up to

1250 kg

The XXL model can haul up to

1200 kg

THE LIGHTEST COMMERCIAL VEHICLE IN THE CATEGORY UP TO 3.5 T

HIGH CAPACITY SPACE

STOP DRIVING TWICE

The structural design of the Eurobox superstructure makes it possible to transport extremely bulky loads in just one trip. Designed with a low platform and 90° walls the Eurobox has excellent headroom that can be used all the way to the ceiling. The low floor height makes loading without equipment easy.

The floor design makes it easy to handle freight. There is even a passageway between the container and the driver's cabin as well as various types of side doors to ensure excellent access.

The XL model can fit up to

19,5 m³

The XXL model can fit up to

24,5 m³

NOW YOU JUST HAVE TO HIT THE ROAD!

MAKE YOURSELF STAND OUT

SPACE FOR YOUR AD

Do you need to paint your Eurobox a specific color? Would you like to have your company name decaled on all or part of the vehicle? Want to add your logo, advertising or message for potential customers? No problem! Our qualified specialists will take care of it. We will first prepare your design, approve it together, and then quickly get it custom made.

STAND OUT, BE UNIQUE!

STANDARD OFFER:

- Full-vehicle decal except cabin plastic
- Partial vehicle decal with cut-out graphics
- Painting of the entire vehicle except cabin plastic
- Painting of cabin plastic
- Painting the container the same color as the cabin (including luton)

ECONOMICAL

SAVE WHEREVER YOU DRIVE

The spacious vehicle container lets you quickly transport multiple loads in a single trip. The lightened construction reduces fuel consumption. The Eurobox comfortably fits in the regular van category. You don't have to pay extra tolls. Your highway tax is lower. Thanks to the sleeper addition you will save on expensive hotels. We ensure fast and reliable service through our network of dealers. All replacement parts are stocked in our warehouse. You will always be able to call an expert who can immediately help you.

WE KNOW TIME IS MONEY.

Eurobox XL, which is in the standard van category, can in a single trip carry freight weighing up to 1,250 kg, which can be loaded into container space accommodating up to 19.5 m³. The overall size of the Eurobox XL makes it an excellent partner when making deliveries to busy urban areas or locations that are difficult to reach. You can also easily transport bulkier freight to distant places. The bed length of the freight space is 3.6 m on Renault Master and Opel Movano platforms, or 3.9 m on Fiat Ducato, Peugeot Boxer and Citroën Jumper platforms. This Eurobox can also be fitted with a trailer hitch to haul a trailer or a sleeper, where you can pleasantly relax on long trips. The low floor height of the Eurobox makes loading without the help of equipment easy. For more demanding loads, the Eurobox XL can also be equipped with a vertical hydraulic lift to facilitate heavy loading.

The Eurobox IZO XL is similar to the standard Eurobox XL. The difference is in the use of special insulating panels that make it possible to transport food goods or medical materials. The heavier insulation panels and the insulated floor reduce the payload by 70 kg.

The Eurobox XXL, which is also still in the standard van category, can in a single trip haul freight weighing up to 1,200 kg, that can be loaded into a cargo area accommodating an unbelievable 24.5 m³. The proportions of the Eurobox XXL are designed to transport both heavy as well as bulky freight in a single trip. This saves time and money, as will the addition of a sleeper, so you won't have to look for expensive hotels on the road. That's why the Eurobox XXL is an ideal model for both domestic and international transport. The low floor height of the Eurobox makes loading without extra equipment easy. The bed length of the cargo space in the Euroboxu XXL is an unmatched 4.4 m for the Renault Master and Opel Movano platforms or 4.6 m for the Fiat Ducato, Peugeot Boxer and Citroën Jumper platforms.

Eurobox IZO XXL is similar to the standard Eurobox XXL. The difference is in the use of special insulaltion panels that make it possible to transport food goods or medical materials. The heavier insulation panels and insulated floor reduce the payload by 100 kg.

EUROBOX VERSIONS
BASIC CONFIGURATION

- Walls and ceiling 25 mm panel, glued into a compact and strong whole
- Plywood floor 9 mm
- Rear wall of the cargo space is fitted with a stainless-steel portal with double-leaf doors with a single stainless-steel bar lock that can be locked, or the doors can be fixed in open position.
