

EUROBOX

CATALOGUE

PARAGAN TRUCKS s.r.o.

We are a manufacturer of commercial vehicle bodies for entire Europe with a tradition for more than **35 years**. The superstructures are flatbed, a box, refrigerated ones, freezers and for bakers. Our flagship is the Eurobox superstructure, which stands out in the **light commercial vehicle category to 3,5 t**.

Our priority is not only to keep the leading position among major manufacturers in Europe, but also the further development of the company. The implementation of state-of-art technologies, product innovation, and continuous improvement of employee qualifications are the parts of our know-how.

We currently employ more than 50 satisfied employees. Our superstructures are characterized by a sophisticated design, a long-term reliability and technical quality. We focus on passenger's comfort and safety transport. We involve our customers directly into the development process of our products. Customers are a constant source of improvement, innovations and great ideas for us.

The **PARAGAN TRUCKS** brand has been already well-known in the world, we deliver our products to **20 European countries** by means of Paragan dealer's network, which has been continuously growing due to an increasing demand of our brand.

EUROBOX SAVES YOUR TIME AND MONEY

Eurobox is the new flagship of the Paragan Trucks company, uniquely offering benefits like extremely high payload, enormous transport capacity, low floor height and all this requiring only a Class B driver's licence. The versatile Eurobox offer many additional options that enable the vehicle to adapt to the specific needs of your business. Eurobox is ideal for both domestic and international transport and can be fitted with a sleeping cab.

ULTRALIGHT ULTRASOLID

WE HAVE REDUCED WEIGHT. WE INCREASED PAYLOAD.

Compared to standart vans, Eurobox is made of special ultra-light and highly resistant material that significantly reduces the weight of the vehicle and increases the payload.

The ecological construction material is highly resistant to chemicals, abrasion and scratching, is not prone to corrosion or rot, and thus quarantees a long service life. Vehicles fitted with Eurobox are in the lightest commercial category up **to 3,5 t.**

payload of **XL model**

up to **1250 kg**

* weight without driver and fuel in the basic version

payload of **XXL model**

up to **1200 kg**

* weight without driver and fuel in the basic version

HIGH CAPACITY SPACE

DRIVE EVERYTHING AT ONCE.

The structural design of Eurobox makes it possible to transport extremely bulky loads in a trice. Designed with a **low platform 90° walls** the Eurobox has excellent headroom than can be used all the way to ceiling.

volume of **XL model**

up to **20 m³**

The low floor height makes loading without equipment easy. The low floor design makes it easy to handle freight. There is even a passageway between the container and the driver's cabin as well as various types of side doors to ensure excellent access.

volume of **XXL model**

up to **25 m³**

STAND OUT IN YOUR ENVIROUS

SPACE FOR YOUR ADVERTISEMENT

- Do you need to paint your Eurobox a specific color?
No problem, we have our paintbox!
 - Would you like to have your company name decaled on the vehicle entirely or partially?
 - Want to add your logo, advertising or message for potential customers?
 - We will advise you on choosing a modern design and ensure professional application of the foil.
- **Full-vehicle decal** except cabin plastic
 - **Partial vehicle decal** with cut-out graphics
 - **Painting of the entire vehicle** except cabin plastic
 - **Painting of cabin plastic**
 - **Painting the container the same color**
as the cabin including sleeper cab

TIME IS MONEY

YOU SAVE, WHERE YOU DRIVE

- Eurobox allows to **affective transport more cargo in one trip**. Lightweight design reduces fuel consumption.
- Eurobox is in the category of commercial vans **up to 3,5 t**. There are advantages associated with this, **you don't pay tolls**, you have lower road tax.

- **Due to the sleeping cab** you save on an expensive hotel. Abroad we provide fast and reliable service through of dealer's network.
- **We have spare parts in stock**. Always you have an expert available on the phone who will help you immediately.

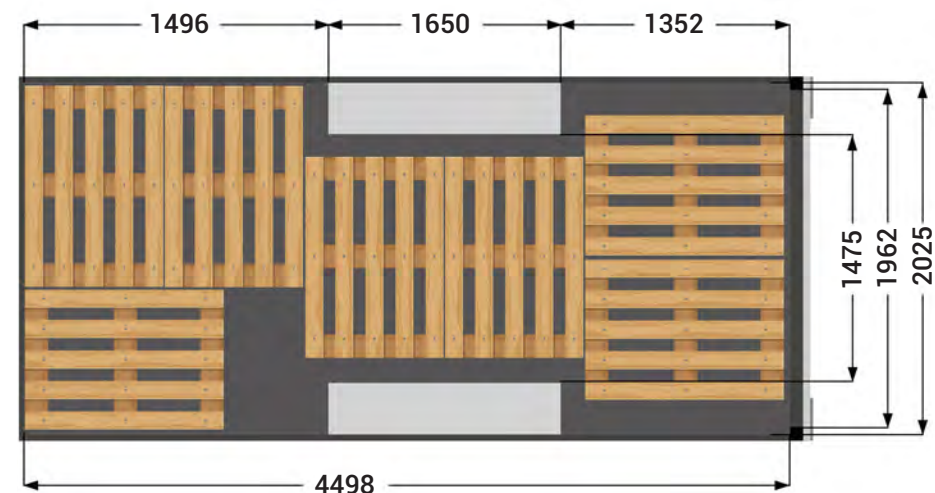

A TRAILER EUROBOX

EXTRA SPACE

It is qualities are **identical to a Eurobox**, so you can transport double the load. The connection of the Eurobox with **the trailer is solved by ramp**. Rear double doors are a matter of course. You can transport cargo with a **volume of up to 42,5 m³ in the set**.

Dimensions are in the basic version.

EUROBOX XL

Eurobox XL, which is in the small van **category N1**. His payload **up to 1250 kg** and internal volume provides cargo space with a volume of **up to 20 m³**. The overall size of Eurobox XL makes it an excellent partner when making deliveries to busy urban areas or locations that are difficult to reach. You can also easily transport bulkier freight to distant places. The loading length of the freight space **3,7 m** on **Renault Master** platforms or **3,9 m** on **Fiat Ducato, Peugeot Boxer, Opel Movano, Toyota Proace Max, Citroën Jumper** platforms. Unbelievable loading length **4,5 m** offers **VW Crafter, Man TGE, Mercedes-Benz Sprinter, Ford Transit and Iveco Daily 35 S**. This Eurobox can also **be fitted with a trailer hitch** to haul a trailer about the weight by the producer. **The space of luton** is optionally available in a sleeping version, where you can relax comfortably during long journeys. **The low floor height** of the Eurobox makes loading without extra equipment easy. For more heavier loads, the Eurobox XL can also be equipped with **a vertical hydraulic lift** to facilitate heavy loading. **At the Eurobox IZO XL** is in standard version use of **special insulating PU panels** that enable to transporting even temperature-sensitive goods.

EUROBOX XL

EUROBOX XXL

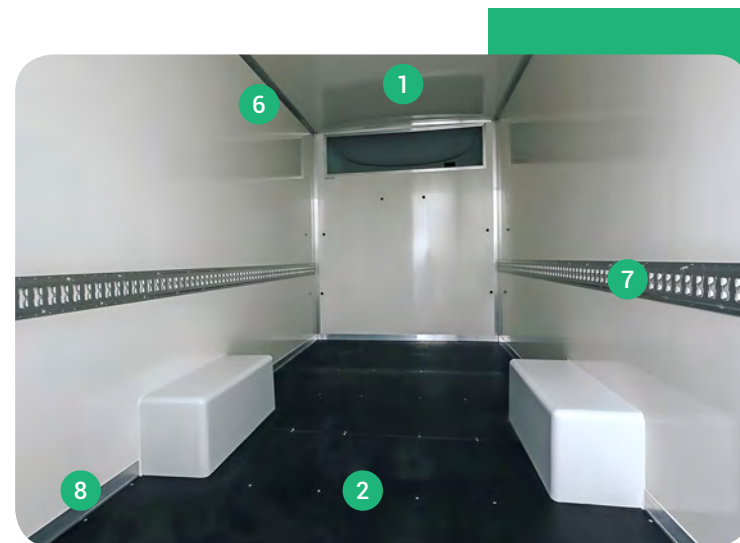

Eurobox XXL, which is in the small van **category N1** and his payload **up to 1200 kg**. The internal space is incredibly large **up to 25 m³**. The proportions of the Eurobox XXL are designed to transport both heavy as well as bulky freight in a single trip. This saves time and money, as will the addition of a **sleeper cab**, so you won't have to look for expensive hotels on the road. That's why the Eurobox XXL is an useful model for both domestic and international transport. **The low floor height** of the Eurobox makes loading without extra equipment easy. This Eurobox can also **be fitted with a trailer hitch** to haul a trailer about the weight by the producer. The loading length of the cargo space in the Eurobox XXL is an **unmatched 4,5 m** for the **Renault Master** platforms or **4,7 m** for the **Fiat Ducato, Peugeot Boxer, Opel Movano, Toyota Proace Max and Citroën Jumper** platforms. Unbelieved loading length of **5,1 m** offers **VW Crafter, Ford Transit, Mercedes-Benz Sprinter, Iveco Daily 35 S and Man TGE** which is available also in **4x4 version**. At the Eurobox IZO XL is in standard version use of **special insulating PU panels** that enable to transporting even temperature-sensitive goods.

BASIC DESIGN

- 1 Walls and roof 25 mm insulated PU panel
- 2 Plywood floor 15 mm
- 3 Rear wall of the box body is fitted with a **stainless-steel portal** with double-leaf doors and two stainless-steel locks
- 4 Space above cabin as an **additional storage**
- 5 Position exterior lighting according to EHK - LED
- 6 Interior LED lights strips
- 7 Trimming line 1 row
- 8 Kick plates protection along front wall
- boxbody rendered in **RAL 9003 color**

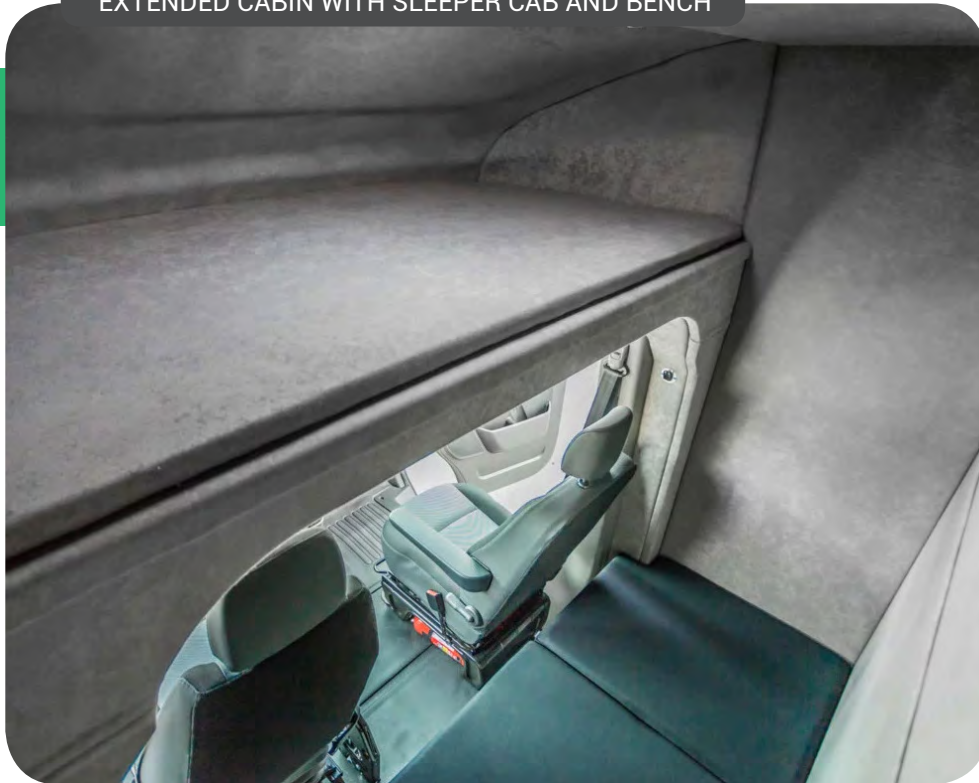

INSULATED FLOOR

CABIN & SLEEPER CAB

Resting during long trips is a must. What if they cancel your expensive hotel at the last minute? Simply sleep in the van. And very comfortably and for free! Standard sleeper cab has a LED lights and ventilation. Or a comfy extended cabin with sleeper above and with a bench behind seats. In winter you appreciate independent heating distribution to the sleeper cab and with a modular clocks. In case of the basic specification, space above cabin is designed as cargo space.

EXTENDED CABIN WITH SLEEPER CAB AND BENCH

CARGO SPACE ABOVE CABIN WITH LED LIGHTS

SPACE ABOVE CABIN AS A SLEEPER CAB

SPACE ABOVE CABIN AS A SLEEPER CAB

FURTHER MODIFICATIONS

We offer three types of side doors to make handling your freight easy. Ideal to use in tight parking spaces in the city when you can't use the rear doors to unload.

Driver's satisfaction above anything else! Do you sleep on the road, even when it's cold? Use independent heating! Do you have trouble backing up? No problem, the camera display will reliably let you know how much room you have left.

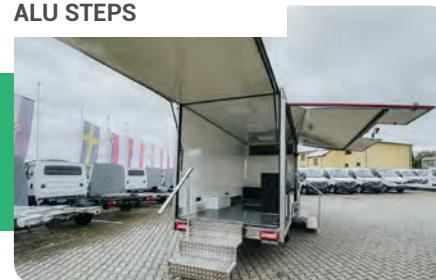

Transport your freight reliably, safely and above all undamaged! We offer many fastening systems for various types of freight.

Comfort and practicality for even better use of your Eurobox. We offer many useful accessories that will help you during your everyday activities. Eurobox is also useful for flower transport, animals, furniture, foodtruck or services, shops and mobile presentation.
